

Archiver for Notes

Situation

Your Lotus Domino environment suffers from storage space overflow, poor performance and or incontrollable backups. Implement the Archiving for Notes solution and you no longer have to bother your users to clean up their mail file or extend your storage space.

One solution to archive any database: mail files, applications, IBM Quickr places, blogs and or wiki's, against restrictions you prefer (database size, oldest documents, largest documents, etc).

Features

- Easy to implement, to configure and to maintain
- Archive Lotus Notes mail, applications and IBM Quickr
- Transparent for your users
- Full Lotus Domino solution
- No Lotus Notes client installations, no mail file design alterations
- Discovery search functionality across databases and archives
- Fulfills the requirements for email compliance regulations
- All aspects of the process are controlled by the Administrator
- Notes security is observed
- Full backup possibility for off-site storage and disaster recovery
- Full iNotes support
- Archive any local database
- Automatic support possibility
