

Workflow Manager

Situation

You want keep overview of the processes in your company; which processes are there, at what level is each process and who is responsible for performing process steps? With the Workflow Manager this is clear.

The Workflow Manager is a powerful, easy-to-use document-based workflow engine that works with any version of Notes/Domino.

Supports any workflow, including Serial, Multiple Approver (i.e. multiple users allocated a document at the same time) and Parallel workflows, with working examples and source code provided.

Features

- Web and Notes enabled
- Support Lotus Notes/Domino R5 and above, including R8
- Easy to create and maintain document based workflow
- No need to create workflow in any design element
- Supplied with source code
- Supports mobile devices
- Allow users to circumvent standard workflow
